India Mutual Fund

PGIM India Ultra Short Term Fund

(An open ended ultra short term debt scheme investing in instruments such that the Macaulay Duration of the portfolio is between 3 Months to 6 Months)

September 2021

What is an Ultra Short Term Fund?

Investing in a diversified set of short term securities such that the fund's Macaulay Duration ranges from 3-6 months

Providing high levels of liquidity*

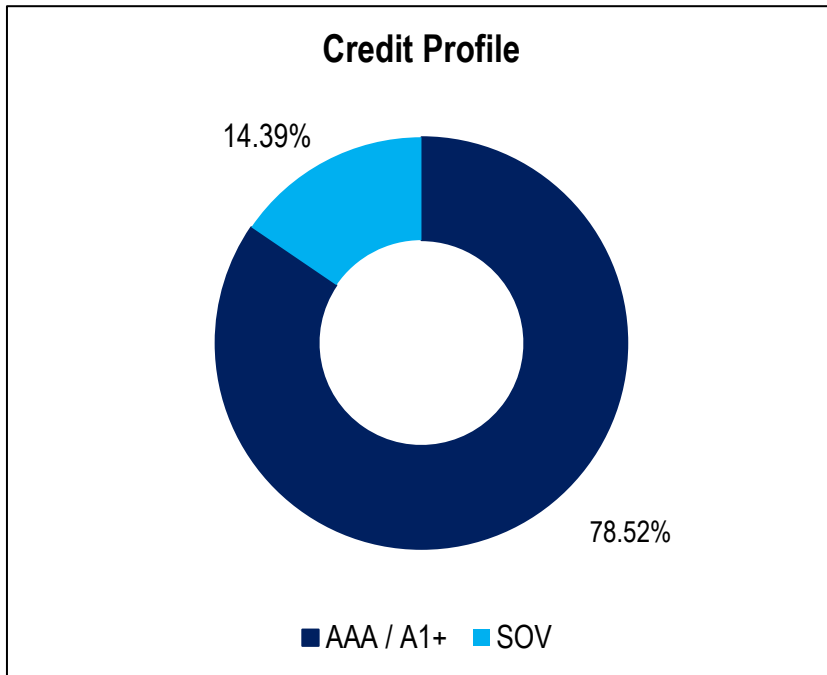

Low to moderate interest rate and volatility risks**

*The Ultra Short Term Fund is an Open-ended fund that offers liquidity with redemption availability on any working day without an exit load.

** Low interest rate and volatility risk arising from positioning of the fund at the shorter end of the maturity spectrum

PGIM India Ultra Short Term Fund

- The Scheme aims to provide liquidity and seeks to generate steady returns, through investments made in a mix of high-quality, short-term debt and money market instruments. *(However, there can be no assurance that the investment objective of the Scheme will be achieved. The Scheme does not guarantee/indicate any returns.)*
- Investments in the Scheme would be made **predominantly into AAA and AA+ rated debt securities.**

Fund Manager's Views

- RBI retained a status quo on all key rates at the October MPC while reiterating support to the economy for as long as was needed to get durable growth back on track.
- Tone of the policy commentary was mildly dovish even as one member dissented in the choice to retain an accommodative stance. As in August, the October policy retained the pro-growth stance.
- Inflation forecast for FY22 was also lowered back to 5.3% from 5.7%, as the next few months is likely to witness favourable readings from positive base effects and improving food inflation.
- RBI addressed liquidity through higher VRRR amounts (raised to INR 6 trillion) and longer tenors (adding 28 days to 7d and 14d) in a bid to mop up excess liquidity.
- The curve is likely to flatten post policy as short term liquidity is mopped up gradually. The longer end will also face some impact as GSAP has been withdrawn and RBI prefers term yields to adjust to market realities as the second wave recedes.

Fund Manager's Views Contd...

- The PGIM India Ultra Short Term Fund enjoys flexibility in being able to deploy beyond 91 Days and will continue to explore and exploit roll-down and investment opportunities along the yield curve
- The Ultra Short Term category is ideally suited for investors with a short term investment horizon of 2 to 6 months
- PGIM India Ultra Short term Fund with its average maturity of 4-6 months is positioned to deliver a steady spread over the liquid fund while keeping volatility low
- The fund is invested 100% in A1+/ AAA rated securities; being the highest credit quality
- The fund remains very selective and is taking calibrated calls on adding new short term positions as short term yields react to additional VRRR measures added at the policy.

Performance
