The Scheme will follow an active duration management strategy.</p> <p>The investment strategies will focus on constructing fixed income portfolios in line with above objective. Portfolio manager will manage the fund based on the outlook on interest rates and liquidity etc. Such outlook will be developed by in-house assessment of various macro factors like economic growth, inflation, credit pick-up, liquidity and other such factors as considered relevant. Credit portfolio management will be primarily guided by external credit ratings assigned by any of the recognized credit rating agency. Additionally, as may be deemed appropriate, inputs may be taken from financial statement analysis, management review, industry trends, capital structure and covenant analysis to identify securities for inclusion / exclusion from credit portfolios. Efficient portfolio construction will be used to manage interest rate risk across different asset class and duration buckets, and optimise risk-adjusted returns.</p> <p>The Scheme may use debt derivative instruments like interest rate swaps like Overnight Indexed Swaps ("OIS"), forward rate agreements, interest rate futures or such other derivative instruments as may be permitted under the applicable regulations.</p> <p>Derivatives may be used for the purpose of hedging, and portfolio balancing and such other purpose as may be permitted under the regulations and Guidelines from time to time.
