

PGIM INDIA SHORT MATURITY FUND

An open ended short term debt scheme investing in instruments such that the Macaulay duration of the portfolio is between 1 year to 3 years

June 2020

Why invest in PGIM India Short Maturity Fund?

PGIM India Short Maturity Fund is a moderate risk fund that seeks to generate returns with low volatility by investing in short/medium term debt securities and money market securities.

Portfolio Characteristics*

- The fund portfolio is a combination of short/medium term bonds.
- The fund currently is invested in AAA/A1+ rated papers and Sovereign Bonds to the extent of 100.00%.

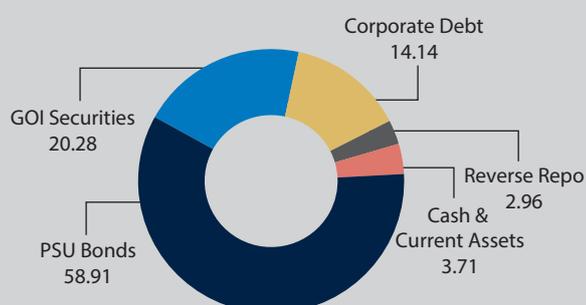

Portfolio Positioning*

- The short duration segment captures twin benefits of relatively lower volatility and 'higher carry'.
- In addition to the 'carry' component, the fund also benefits from ongoing improvement in liquidity conditions, which positively impacts any money market holdings and short term bonds (12-36 months) in the portfolio.

Who should invest?

Investors with more than 12 months time horizon can look at investing in the fund.

Indian Railway Finance Corporation Ltd	6.29	CRISIL AAA
Rural Electrification Corporation Ltd.	6.24	CRISIL AAA

Macaulay Duration: The Macaulay duration is the weighted average term to maturity of the cash flows from a bond. The weight of each cash flow is determined by dividing the present value of the cash flow by the price.

All the above data are as on June 30, 2020. * These are based on fund manager's current outlook & Subject to change.

Fund Manager's View

Macro Review

- Data gathering was hampered by the ongoing lockdown, which led to the CPI combined General Index not being published for May-20. However, some major indices have been published with limited information.
- Consumer food price inflation eased from 10.5% to 9.3% mainly on the basis of vegetable price inflation cooling off to single digits at 5.3% YoY after a long time. Other than vegetables, most other items are showing an uptick. Protein-based items such as Meat and Fish rose significantly (by 16% YoY).
- Housing index showed a decline with activity muted in the month of May, with inflation at 3.7% YoY as compared to 3.94% YoY in Apr-20. Fuel and Light index too showed a decline with inflation at 1.43% YoY as compared to 2.93% YoY in the previous month, as activity remained muted throughout the month.
- The only sub-component published in the miscellaneous group was Health, which showed an uptick in inflation, at 4.3% as compared to 2.8% in Apr-20. Going forward, as the restrictions on transport loosen up further, the prices of essentials should also stabilize. Moreover, with a normal monsoon, expectations of food inflation stabilizing should provide some relief to the consumer.

Liquidity and Rates

- Liquidity conditions continued to remain in surplus mode in line with RBI's accommodative stance and the pledge to improve transmission of past rate cuts. Average daily LAF balances for June stood at INR 3.78 trillion compared to INR 5.09 trillion in May.
- Average LAF Balance declined as WMA borrowing fell to zero compared to 1lac-1.5 lac cr in May, which infused temporary additional liquidity. Currency leakage in the first 3 weeks of June was around INR 44,000 cr compared to INR 81,000 cr in May.
- The Rupee appreciated by 10 paise (0.13%) against the USD in June. Brent Crude oil continued to trade in the range of USD 35/bbl to USD 45/ bbl in

the month of May and continued the bullish bias as the economies reopened economic activity thereby increasing the demand for the commodity.

- Government bonds traded in a narrow range of 10bps for the whole month. Markets ignored most of the negatives from S&P outlook change, spike in oil prices and rise in Covid cases.
- Although 10yr+ segment was largely flat and nonvolatile for the month, one saw nice move down in belly of the curve (4yr to 8yr) where yields closed 15-20bps lower for the month. Towards the end of the month, RBI announced OMO Twist for INR 100bn which further helped bonds. Like in May, we saw primary auctions getting very good demand from local banks, with the RBI continuously exercising green shoe options in each of the auctions despite being large-sized auctions.
- Corporate bonds once again outperformed government bonds but the spread compression was not so stark as the last month. The key reason for corporate bond outperformance was the substantial inflows in MFs Scheme which invest predominantly in corporate bonds.
- The lack of supply in corporate bonds, also led to a downtick in yields with a major fall in yields witnessed in high yield AAA corporate bonds like PFC/REC/HDFC etc.

Outlook

- We expect the bond market to remain positive on the back of softer food inflation, abundant liquidity, lower growth, stable crude oil price and possibility of further OMO twist announcements.
- Front end of the curve could move lower given excess liquidity and rate cut hopes, whereas the longer end will face volatility from weak tax revenues and further OMO purchase announcements.
- Given this backdrop, we find the short end of the curve (up to 5 years) attractive due to attractive term spread over the overnight rate and extremely easy liquidity conditions.

About Us

PGIM India Mutual Fund is a wholly owned business of PGIM, the global investment management business of the US based Prudential Financial, Inc. (PFI).
