

PGIM INDIA SHORT MATURITY FUND

An open ended short term debt scheme investing in instruments such that the Macaulay duration of the portfolio is between 1 year to 3 years

November 2020

Why invest in PGIM India Short Maturity Fund?

PGIM India Short Maturity Fund is a moderate risk fund that seeks to generate returns with low volatility by investing in short/medium term debt securities and money market securities.

Portfolio Characteristics*

- The fund portfolio is a combination of short/medium term bonds.
- The fund currently is invested in AAA/A1+ rated papers and Sovereign Bonds to the extent of 100.00%.

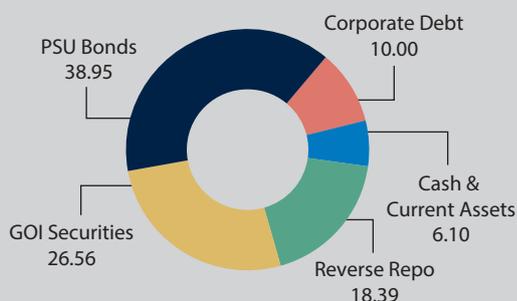

Portfolio Positioning*

- The short duration segment captures twin benefits of relatively lower volatility and 'higher carry'.
- In addition to the 'carry' component, the fund also benefits from ongoing improvement in liquidity conditions, which positively impacts any money market holdings and short term bonds (12-36 months) in the portfolio.

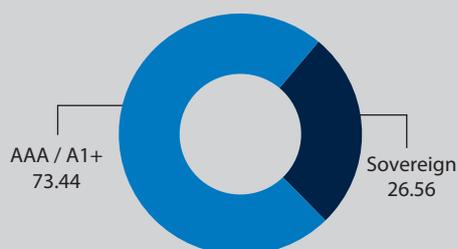

Who should invest?

Investors with more than 12 months time horizon can look at investing in the fund.

Indian Oil Corporation Ltd.	3.67	CRISIL AAA
National Bank For Agriculture & Rural Development	2.77	CRISIL AAA

Macaulay Duration: The Macaulay duration is the weighted average term to maturity of the cash flows from a bond. The weight of each cash flow is determined by dividing the present value of the cash flow by the price.

All the above data are as on November 30, 2020. *These are based on fund manager's current outlook & Subject to change.

Fund Manager's View

Macro Review

- CPI for October 2020 continued to remain stubbornly high, printing at 7.6% (up from 7.3% in September).
- While food continues to remain the culprit as in the previous months, core inflation in excess of 5% also remains a source of worry.
- As the economy gradually emerges from the lockdown and activity levels rebound to pre-covid levels, we expect upward impulses to the core.
- So, even as the headline may benefit from falling food inflation, core may pose problems as recovery gathers pace.
- Already crude oil is in the mid 40s and is showing signs of stabilising around these levels. While most of the developed markets continue to battle the second / third wave as winter sets in, the roll-out of the vaccine (expected in the US as early as December itself) globally in the first quarter may accelerate recovery as we go through 2021.
- As such, while CPI is likely to soften, we expect the average for FY 2021 to be closer to 6% and to range in the 5.5% to 6% band for H1-FY 2022.

Liquidity and Rates

- Liquidity conditions continued to remain ultra-benign with daily system average liquidity now crossing the INR 5 trillion comfortably.
- The woes of RBI are now being compounded as FDI flows are being supplemented by strong FII inflows as well. November was one of the strongest flows for equity ever, registering inflows of INR 69,476 cr
- For the calendar year 2020, equity has witnessed inflows of INR 1.19 trillion, completely erasing outflows in debt which stood at INR 1.07 trillion in the same period.
- For context, average daily LAF balances in September, for instance, stood at INR 3.31 trillion and at INR 3.68 trillion in August.

GDP data – Q2/FY 2020

- India's second quarter GDP for the period from July to September 2020, rebounded strongly. For the 3-month period, the GDP contracted by 7.5% (over the previous year), much lower than the -23.9% (year / year) contraction of the first quarter and also lower than the consensus

estimates ranging from -7 to -9%. GVA (Gross value added = GDP plus taxes minus subsidies) contracted by a lower amount of 7% in Q2.

- Among the highlights, drivers of the rebound included a pick-up in agriculture (+3.4% y/y – flat vs Q1) and industry (much lower contraction of -2.1% as against -38.1% in Q1 FY 21). Industry constituents that did well include electricity, home goods, power sales, cement dispatches, consumer durables, auto etc.
- Part of the pick-up was led by pent-up demand and buying for the festive season. High frequency indicators have been signaling a pick-up in economic activity towards the end of Q2 which is also reflected in the numbers.
- Alternatively, viewed on the expenditure side, the main drivers to a better performance in Q2 was private consumption (aided by the stimulus and gradual unlocking of the economy, pent-up demand and the festive season), net exports and gross fixed capital formation.

Outlook

- While the second quarter performance has been promising, the outlook for the second half of FY 2021 will depend on continuation of demand post the festive season. While Q2 accounted for a lot of pent-up demand from Q1, spillover into Q3 and Q4 could be minimal. However, ground level activity as reflected in the high frequency data reflects that demand in tier 2, 3, 4 cities and towns is re-emerging.
- The combination of manufacturing incentives for various sectors under the PLI (Production Linked Incentive schemes) and the impact of lower interest rates should also play a role in enabling demand pick-up. Financial conditions in India in the last three years from 2017-March 2020 have been particularly tough, stifling demand and investment. Impact of stimulus (putting more money in the hands of rural population, agri sops), higher forex flows (both FDI and FII) plus RBI's buying activity in Government bonds (both G Secs and SDL) is also aiding liquidity.
- With CPI likely to stay well over 4%, monetary space for RBI is limited. Coupled with the rebound, prospects of a rate cut appear low. However, RBI is likely to maintain the accommodative monetary stance for the foreseeable future as was reiterated in the previous policy, given the need for effective rate transmission which is still an unfinished agenda.

About Us

PGIM India Mutual Fund is a wholly owned business of PGIM, the global investment management business of the US based Prudential Financial, Inc. (PFI). PGIM India Mutual Fund offers a broad range of equity and fixed income solutions to retail and institutional investors throughout the country.
