PGIM India Mutual Fund

PGIM INDIA DYNAMIC BOND FUND

An open ended dynamic debt scheme investing across duration

Rated AAAmfs by ICRA##

March 2021

Why invest in PGIM India Dynamic Bond Fund?

- PGIM India Dynamic Bond Fund is rated as [ICRA] AAAmfs denoting the highest level of safety regarding timely receipt of payments from the investments that they have made.
- PGIM India Dynamic Bond Fund is an actively managed duration fund. The Fund seeks to generate Alpha by taking calls based on active duration / interest rates or on spreads between the curves (that is, the AAA and Government securities) or on the shape of the yield curve.

Portfolio Positioning*

- The Fund typically invests predominantly in Government Securities and AAA rated High Quality PSU / Corporate Bonds. The Fund is an actively managed duration fund and will not invest in accrual strategies.

Who should invest?

PGIM India Dynamic Bond Fund is meant for investors who are averse to holding credit risk but who have an appetite to handle volatility arising from duration risk in the portfolio. Ideally meant for investors with a horizon of 18 months and longer.

Macaulay Duration: The Macaulay duration is the weighted average term to maturity of the cash flows from a bond. The weight of each cash flow is determined by dividing the present value of the cash flow by the price.

Fund Manager's View

Inflation

- After the CPI softened in January 2021 (at 4.06%), it moved higher again at 5.03% in February. The uptick was broad-based with rise in prices across the board.
- Surprisingly, food prices declined on a sequential basis (by 0.44%), although they rose annually (up 4.25%). Furthermore we expect the winter harvest to keep food inflation in check until the start of the summer months.
- Fuel inflation on the other hand rose both sequentially and annually as the fuel basket witnessed an upward pressure on the back of rising global crude prices.

Rates and liquidity

- After a weak February, yields stabilised in March on the back of continued RBI action. Towards the latter part of the month, RBI also cancelled its last bond auction. This was well received by the market, which led to a strong rally, with benchmark yields coming off by 8-10 bps.
- The auction cancellation was made possible by robust Government cash balances owing to surprisingly high direct and indirect tax collections, for the March quarter. Moreover, GST collections in March hit a record INR 1.24 trillion, the highest since the start of the GST regime.
- System liquidity continued to remain quite comfortable through the month. Core liquidity remained in surplus mode with LAF tracking upwards of INR 6 trillion on a consistent basis.

Outlook

- Bond yields have been anchored for now by RBI's continued intervention in the secondary markets. Borrowing calendar for the first half of FY22 does not have any major surprises, with RBI looking to mop up 60% of the aggregate requirement (of INR 12.05 trillion) in H1. There is also a higher mop up planned at the longer end of the curve. Tenors up to 3 years have the least amount of planned borrowing.
- The nature of planned market borrowing should in general lead to a natural steepening in the curve. However, much of the manner in which the yield curve reacts in FY22 will depend on RBI's intervention in the markets. The surprise element could happen from tax revenues that have been showing some buoyancy and could generate higher flows.
- Given RBI's continued reiteration of keeping yields under control, we expect pre-emptive action if yields were to rise unusually at some point. For most part however, we expect the yields to remain range bound.
- Recent reversal in global yields and a rebound in the economy and rising inflation in our view leads to an upward shift in the lower end of the band. We expect the 10-year yields to range between 6.00 – 6.50%.

About Us

PGIM India Mutual Fund is a wholly owned business of PGIM, the global investment management business of the US based Prudential Financial, Inc. (PFI). Investment Style Box

##ICRA has assigned the "[ICRA] AAAmfs" (pronounced as ICRA triple A m f s) rating to the PGIM India Dynamic Bond Fund. Schemes with this rating are considered to have the highest degree of safety regarding timely receipt of payments from the investments that they have made. The ratings should, however, not be construed as an indication of the performance of the Mutual Fund scheme or of volatility in its returns For complete rating scale and definitions please refer to ICRA's Website www.icra.in or other ICRA Rating Publications ICRA Credit Quality Rating Methodology for debt mutual fund schemes ICRA's mutual fund rating methodology is based on evaluating the inherent credit quality of the fund's portfolio. As a measure of the credit quality of a debt fund's assets, ICRA uses the concept of "credit scores". These scores are based on ICRA's estimates of credit risk associated with each exposure of the portfolio taking into account its maturity. To quantify the credit risk scores, ICRA uses its database of historical default rates for various rating categories for various maturity buckets. The credit risk ratings incorporate ICRA's assessment of a debt fund's published investment objectives and policies, its management characteristics, and the creditworthiness of its investment portfolio. ICRA reviews relevant fund information on an ongoing basis to support its published rating opinions. If the portfolio credit score meets the benchmark of the assigned rating during the review, the rating is retained. In an event that the benchmark credit score is breached, ICRA gives a month's time to the debt fund manager to bring the portfolio credit score within the benchmark credit score. If the debt fund manager is able to reduce the portfolio credit score within the benchmark credit score, the rating is retained. If the portfolio still continues to breach the benchmark credit score, the rating is revised to reflect the change in credit quality.

Riskometer

This product is suitable for investors who are seeking*:

- Regular income for short term
- To generate returns through active management of a portfolio of debt and money market instruments
- Degree of risk – MODERATE

*Investors should consult their financial advisers if in doubt about whether the product is suitable for them.
