

PGIM INDIA HYBRID EQUITY FUND

An open ended hybrid scheme investing predominantly in equity and equity related instruments

February 2021

Keeping the Balance.....Right.....

Generally, Hybrid funds have generated returns with low volatility over the long term.

Annualised Returns as on February 26, 2021. Source: AMFI & Bloomberg

The debt component of the benchmark is TRI since inception. For equity component of the benchmark, i.e. S&P BSE 200 PRI value is used till 31st July 2006 and TRI is used since 1st Aug 2006. Past performance may or may not be sustained in future.

A hybrid fund provides significantly low volatility vis-à-vis an equity portfolio

Index	Volatility (Annualized)
NIFTY 50 TR Index	18.45%
CRISIL Hybrid 35+65 - Aggressive Index	11.49%

As on February 28, 2021. Source: Internal Research. The above measures are based on Standard deviation and are for the last 6 years.

Why invest in PGIM India Hybrid Equity Fund?

The PGIM India Hybrid Equity Fund strives to provide the best of both the worlds. It seeks to provide exposure to both the asset classes - equity and debt. Such an asset allocation provides investors the following benefits

- Significant equity exposure with the opportunity to benefit from potential high returns in equity
- Income generation from the significant allocation to debt instruments
- The diversification in asset classes provides a potential hedge from the underperformance of either asset class
- Lower volatility than an equity fund as the debt component and the lower allocation to equity tends lower the portfolio volatility
- Investors also benefit from the tax efficiency of the scheme as it is considered an equity oriented fund for the purpose of taxation.

The Investment Mandate

The Expected positioning :

- Equity investments of 65-80% (including arbitrage); and
- Debt investments of about 20-35%.
- Units issued by InVITs and REITs

Current Portfolio Positioning*

Equity Allocation

- We look for market share gainers and steady compounders, i.e. stocks that have delivered consistent & superior earnings growth & performance.
- Market share gainers are companies growing faster than the segment in which they operate.
- Steady Compounders are high growth and high quality companies with consistently high ROE.
- These stocks usually trade at higher multiples, but do not appear expensive on a PEG basis.
- Number of stocks : 30-45 (Unhedged)

Arbitrage and Fixed Income Allocation

Arbitrage: Plain vanilla arbitrage strategies of buying stock in cash and selling its futures to capture the arbitrage opportunities through premium / dividend.

Fixed Income: Our approach is to run a quality portfolio to provide stable returns with low volatility. Currently, fixed income portfolio seeks to maintain average maturity of short to medium Term.

Who should invest?

PGIM India Hybrid Equity Fund is ideal for investors with an investment horizon of 3-5 years, seeking to invest in a diversified and balanced portfolio of debt and equity instruments.

[^]For PGIM India Hybrid Equity Fund, the BSE 200 has been used for comparison (The benchmark CRISIL Hybrid 35+65 - Aggressive Index comprises of BSE 200 (65%), CRISIL Composite Bond Fund Index (35%))The data pertains to only the unhedged equity allocation of the portfolio (73.03% of the total portfolio as on February 28, 2021) and compared to the data of the BSE 200.

Return on Equity: Return on equity (ROE) is the amount of net income returned as a percentage of shareholders equity. Return on equity measures a corporation's profitability by revealing how much profit a company generates with the money shareholders have invested. **Debt/Equity (ex-financials):** Debt/Equity Ratio is a debt ratio used to measure a company's financial leverage, calculated by dividing a company's total liabilities by its stockholders' equity. The D/E ratio indicates how much debt a company is using to finance its assets relative to the amount of value represented in shareholders' equity. (Ex-Financials means excluding Banks and NBFCs). **Price/Earnings:** The price-earnings ratio (P/E Ratio) is the ratio for valuing a company that measures its current share price relative to its per-share earnings.
