PGIM India Mutual Fund

PGIM INDIA MONEY MARKET FUND

An open ended debt scheme investing in money market instruments.
A relatively low interest rate risk and moderate credit risk scheme.

Rated A1+mfs by ICRA##

January 2024

Money Market Fund – A worthwhile option for the short term

A Money Market Fund is permitted to invest in money market instruments which are essentially discounted instruments viz. bank certificates of deposits, Commercial papers, T-bills etc. These instruments can be issued for a maximum maturity of 1 year. The fund enjoys investment flexibility since it can invest in instruments with 1 year tenor.

Why invest in PGIM India Money Market Fund?

The PGIM India Money Market fund is a "low to moderate volatility" fund that seeks to deliver reasonable market related returns through investments in money market instruments such as Commercial Papers, Bank Certificate of Deposits and T bills, all instruments with a maximum tenor of a year.

Portfolio Positioning* and Strategy

- The fund will invest across a range of money market instruments including Commercial Papers (CPs), Certificates of Deposits (CDs), Treasury Bills, Cash Management Bills (CMBs) and other discounted instruments with tenors not exceeding 1 year. CP investments are restricted to high grade CPs (with long term ratings of AA+/AAA)
- Positioning along the money market curve, depends on steepness and the potential roll-down opportunities that may arise from time to time.
- The Fund will be positioned based on an analysis of liquidity conditions, the shape of the yield curve and other macro-economic indicators.
- Currently, the mid segment of the money market curve looks more attractive and given the existing steepness in this portion, the fund is invested in the 4-9 month segment, . Hence, the average maturity of the fund is closer to the lower end of the band.
- Currently, the portfolio only comprises of AAA/A1+ rated securities and Sovereign Bonds.

Who should invest?

- PGIM India Money Market Fund is ideal for investors with the investment horizon of 6-12 months.
- Investors looking for investment avenues to park idle surplus funds for short term and with high liquidity and relatively low return volatility should consider this fund.

Fund Manager's View

- The first month of 2024 saw the continuation of the theme of macroeconomic stability as growth continued to surprise on the upside with 'core' inflation continuing its downward trend coming in below 4%. The first advance GDP estimate for FY24 came in at 7.30% against market expectations of 6.70% and PMIs also continued the robust trend. The combination of strong growth and low inflation makes for a goldilocks macro-economic scenario for India in a fragile global economic landscape. The Interim Budget presented on 1st Feb 2024 further buttressed the strong underlying macroeconomic fundamentals as it projected a lower-than-expected fiscal deficit of 5.1% for FY25 leading to a mini bond rally. The markets were expecting a fiscal deficit of 5.3% and a gross borrowing number around INR15 trn. The gross borrowing came in at INR14.3 trn. Thus, the bond markets got a fresh lease of life post budget with the benchmark 10 yr bond yield lower by 9 bps on the budget day. The yield curve flattened during the month and after the interim budget, with the longer end of the curve outperforming the shorter end of the curve as the actual state government (SDL) borrowings are lower than the indicative calendar. Banking sector liquidity was tight for most of the month resulting in elevated money market yields. The key reason for the tightness in interbank liquidity continues to be a very high government surplus to the tune of INR 3-4 trn. One of the reasons for the high government surplus can be attributed to the strategy of meeting the redemption proceeds of government securities through the GST compensation cess, which is also the reason for lower gross borrowing for the next fiscal. Given the decelerating trend of core inflation and the fiscal prudence stance of the government, we believe that the monetary policy stance will be changed to 'neutral' in the February MPC meeting.
- Brent crude rose by 6% during the month on back of continuing disruptions in Red Sea, though INR was pretty stable and appreciated marginally by 0.20% during the month. CPI inflation came in at 5.69% in line with consensus and core inflation continued its downward trajectory coming in at 3.90% which is a 4yr low.
- PFI inflows in debt continue to be strong in the new year with USD 2.3 bn of flows in January 2024 after USD 7 bn inflow during CY 2023.
- The OIS curve was flat during the month with the 1yr OIS down by 4 bps at 6.60% and 5yr OIS at 6.19%. It had outperformed the sovereign curve last month in consonance with the movement in US yields. The benchmark 10yr bond yield was down by 3 bps.
- The FOMC policy was on expected lines with the Fed pushing back on expectations of an earlier / faster rate cutting cycle though bond yields in US were lower after the US treasury reduced its Q1 CY2024 borrowing to USD 760 bn against the market expectations of USD 850 bn, and lower than its own earlier estimate of USD 816 bn. Even the Q2 CY2024 borrowing number stands at USD 206 bn against the market expectations of USD 350 bn.
- Global bond yields led by US treasury yields were flat during the month after the massive rally in the last two months of 2023. The US bond market is pricing in 125 bps rate cuts this year, which might prove to be optimistic given the cautious Fed stance amidst strong growth. RBI is likely to start cutting rates only after the global rate cutting cycle has started, which in our view, is likely to happen from Q2/Q3 of CY 2024 onwards. Markets tend to react before the start of a rate cutting cycle and the current yields offer a good opportunity for investors to increase their allocation to fixed income as slowing growth and moderating inflation is likely to lead to rate cuts in 2024.
- Bond yields tend to move in advance of rate action and investors can look to increase allocation to fixed income as we expect long bond yields to keep drifting lower and expect the benchmark 10yr bond yield to go lower towards 6.50% by Q2/Q3 of CY 2024.

About Us

PGIM India Mutual Fund is a wholly owned business of PGIM, the global investment management business of the US based Prudential Financial, Inc. (PFI). PGIM India Asset Management is the full service investment manager of PGIM India Mutual Fund, offering a broad range of equity and fixed income solutions to retail and institutional investors throughout the country. Relatively High (Class III)			

Macaulay Duration: The Macaulay duration is the weighted average term to maturity of the cash flows from a bond. The weight of each cash flow is determined by dividing the present value of the cash flow by the price.

ICRA has assigned the "[ICRA]A1+mfs" (pronounced as ICRA A one plus m f s) rating to the PGIM India Money Market Fund. Schemes with "[ICRA]A1mfs" rating are considered to have very strong degree of safety regarding timely receipt of payments from the investments that they have made. Modifier {"+" (plus)} can be used with the rating symbol to reflect the comparative standing within the category. The ratings should, however, not be construed as an indication of the performance of the Mutual Fund scheme or of volatility in its returns For complete rating scale and definitions please refer to ICRA's Website www.icra.in or other ICRA Rating Publications ICRA Credit Quality Rating Methodology for debt mutual fund schemes. ICRA's mutual fund rating methodology is based on evaluating the inherent credit quality of the fund's portfolio. As a measure of the credit quality of a debt fund's assets, ICRA uses the concept of "credit scores". These scores are based on ICRA's estimates of credit risk associated with each exposure of the portfolio taking into account its maturity. To quantify the credit risk scores, ICRA uses its database of historical default rates for various rating categories for various maturity buckets. The credit risk ratings incorporate ICRA's assessment of a debt fund's published investment objectives and policies, its management characteristics, and the creditworthiness of its investment portfolio. ICRA reviews relevant fund information on an ongoing basis to support its published rating opinions. If the portfolio credit score meets the benchmark of the assigned rating during the review, the rating is retained. In an event that the benchmark credit score is breached, ICRA gives a month's time to the debt fund manager to bring the portfolio credit score within the benchmark credit score. If the debt fund manager is able to reduce the portfolio credit score within the benchmark credit score, the rating is retained. If the portfolio still continues to breach the benchmark credit score, the rating is revised to reflect the change in credit quality.

The views of the Fund Manager should not be construed as an advice and investors must make their own investment decisions regarding suitability of the funds based on their specific investment objectives and financial positions and using such independent advisors as they believe necessary.

Mutual Fund investments are subject to market risks, read all scheme related documents carefully.
