

PGIM INDIA SHORT MATURITY FUND

An open ended short term debt scheme investing in instruments such that the Macaulay duration of the portfolio is between 1 year to 3 years

August 2021

Why invest in PGIM India Short Maturity Fund?

PGIM India Short Maturity Fund is a low to moderate risk fund that seeks to generate returns with low volatility by investing in short/medium term debt securities and money market securities.

Portfolio Characteristics*

- The fund portfolio is a combination of short/medium term bonds.
- The fund currently is invested in AAA/A1+ rated papers and Sovereign Bonds to the extent of 93.77%.

Portfolio Positioning*

- The short duration segment captures twin benefits of relatively lower volatility and 'higher carry'.
- In addition to the 'carry' component, the fund also benefits from ongoing improvement in liquidity conditions, which positively impacts any money market holdings and short term bonds (12-36 months) in the portfolio.

Who should invest?

Investors with more than 12 months time horizon can look at investing in the fund.

Asset Allocation (% AUM)

*All the perpetual bonds in PGIM India Short Maturity Fund are Basel III bonds.

Credit Quality Profile (% AUM)

4.70 GOI Floating Rate Mat 2033	5.01	SOV
Small Industries Development Bank Of India	3.80	CARE AAA

Macaulay Duration: The Macaulay duration is the weighted average term to maturity of the cash flows from a bond. The weight of each cash flow is determined by dividing the present value of the cash flow by the price.

*All the above data are as on August 31, 2021. * These are based on fund manager's current outlook & Subject to change.*

Fund Manager's View

Inflation

- After two consecutive months of over 6% prints, CPI for July (released in August), came in lower at 5.59%. Besides a favorable base, slowing monthly momentum in prices across most categories of food and non-food helped the lower inflation. Fuel prices however continued their firm trend given higher prices of petrol and diesel and no significant easing in crude prices. Core inflation remained sticky, printing at 6.02%, down marginally from 6.25% in the previous month (a 7-month high).
- IIP came in at 5.7% (-8.4% in the previous month) in June, after 2 consecutive months of contraction. High frequency indicators such as auto dispatch, electricity consumption, e-way bills, GST collections were signaling a revival, post the peaking of the second wave in June. For the month, the leading engines of IIP included manufacturing and electricity.

Rates and liquidity

- Liquidity, already in a surplus, continued to rise steadily month-on-month. From over INR 6.85 trillion in July, the durable system liquidity rose further to over INR 9.5 trillion. Steady dollar inflows which continue unabated have been responsible in a big way for the excess liquidity. CIC outflows after the mid-year have slowed down as well, thereby leading to excess liquidity.
- Decision to scale up VRRR (Variable Rate Reverse Repo) at the MPC should help to soak up some of this liquidity, although the residual liquidity will still remain meaningful.
- As a result of this excess liquidity, front-end yields rallied meaningfully. One-year CD yields fell by almost 20 bps with the long end (10-year benchmark) remaining flat. This led to a steepening in the yield curve through the month. The short end covering the 1-3 bonds, also rallied sharply given the limited liquidity bias and limited supply.

August MPC outcome

- As expected, the August MPC was a status -quo with RBI leaving all key rates unchanged. A pro-growth stance will leave surplus liquidity in the

system, as the MPC has been keen to revive growth in a sustainable manner. There was no change in the accommodative stance either.

- However, the RBI initiated baby steps towards normalizing excess liquidity by proposing doubling of the liquidity suction under VRRR from INR 2 trillion to INR 4 trillion.
- Interestingly, the vote for an "accommodative stance" was not unanimous as in the previous meetings, with 1 member in favor of a "neutral stance". The inflation forecast was also raised from 5.1% to 5.7%. The road to normalization of inflation appears some time away, given stubbornly high commodity prices, supply disruptions, higher logistics costs. Besides, severe disruptions faced by the informal sector and small businesses have been highly inflationary, as these firms have competitive cost structures and are highly active in the production of a wide array of goods such as textiles, garments etc.

Outlook

- Minutes of the MPC meeting reveal that both the Governor and Deputy Governor were highly accommodative in their stance articulating the need for handholding of the economy for a longer time as recovery was still nascent and was yet to take root. Given the ongoing support in most of the developed markets, wherein the fiscal support has also been higher, RBI is likely to err on the side of continued support for longer until the growth outlook is more certain and worries around a third wave recede.
- Given this background, we recommend products such as corporate bond funds, PGIM India Premier Bond Fund and PGIM India Banking & PSU Fund for investors with a 1-3 year horizon. The PGIM India Dynamic Bond Fund is an option for investors with an ability to handle some volatility while seeking duration gains. Investors with a shorter time horizon of up to 6 months should look at the PGIM Ultra Short term Fund, a high quality fund that invests predominantly in the 3-12-month segment to maintain duration under 6 months.

About Us

PGIM India Mutual Fund is a wholly owned business of PGIM, the global investment management business of the US based Prudential Financial, Inc. (PFI).
